

OFFICIAL NEWSPAPER FOR MUNICIPAL DISTRICT OF BATTLE RIVER, No. 423, and MUNICIPAL DISTRICT OF KINSALLA No. 424, and VILLAGE OF IRMA
The Only Medium That Covers this Large Mixed Farming Area, and Oil and Gas Field Thoroughly.

Vol. 15; No. 28.

Irma, Alberta, Friday, July 24th, 1931.

\$2.00 per year in advance; 5c per copy.

WHEAT POOL TO REPAY PROVINCES

Regina, Sask., July 20th.—Repayment of Canada Wheat Pool indebtedness will be made out of the earnings of the Provincial Elevator systems, which will continue to function in Manitoba, Saskatchewan and Alberta as the property of the Provincial Wheat Pools.

Creation of an interprovincial trading corporation is left in the hands of a committee consisting of three provincial government representatives and three other representatives of the Pool Elevator Systems of Saskatchewan, Manitoba and Alberta.

Such are the four points of Canada's Wheat Pool reorganization and fiscal policy decided by Premier Anderson of Saskatchewan, Premier Bracken of Manitoba and Premier Brownlee of Alberta at the conclusion of a two-day conference in Regina, Friday afternoon.

Their findings will be submitted to the interested parties at an early date.

Assured Support
A selling organization, in keeping with Premier Bennett's suggestion, is to be set up, thereby assuring financial support from the Dominion Government.

As to who will head the new selling corporation no details were given the press but it is understood in good authority that pressure will be brought to bear on John I. McFarland to accept the position.

Following the action of Alberta it is considered possible that the Saskatchewan Wheat Pool will announce an initial price of 30 cents per bushel in the course of the next few days.

Official Statement
"Western Canada's 1931-32 grain owned by the Canada Wheat Pools will be marketed through the provincial Pool elevator systems "which will continue to function in the interests of the farmer," states the official statement issued Friday. The Department of the Canada Wheat Pools' 1929 indebtedness to the provincial governments, spread over a period of 20 years, will be paid out of the earnings of the elevator systems under a fiscal policy "which will prevent any obstacle whatever to the operation of the elevator facilities of the three provincial Pools."

It is confidently expected that the general proposals made to the premiers of the three prairie provinces by Premier Bennett will be accepted, subject only to certain modifications designed to meet the views of all concerned.

These proposals which include the creation of an interprovincial board and leasing of the three provincial elevator systems to handle the 1931-32 crop, will be considered by a special committee appointed Friday. On this committee are representatives of the three provincial governments and the three provincial Pool elevator systems.

PUBLIC NOTICE

IN THE ESTATE OF NORMAN VICTOR KING, late of Fabyan, in the Province of Alberta, Farmer, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Norman Victor King, deceased, who died on the 13th day of May, 1930, are required to file with the undersigned Solicitor for the Executrix, at Wainwright, Alberta, by the 21st day of September, A. D. 1931, a full statement, duly verified of their claims and of any securities held by them; and after that date the Executrix will distribute the Estate of the said Norman Victor King among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to her knowledge.

DATED the 15th day of July, A.D. 1931.

M. G. Cardell, Wainwright, Alta.
Solicitor for the Executrix.

The Richard Kent Stock Company, will present two shows in Irma this week. Friday night "His Unknown Wife" a farce comedy will be presented. Saturday night a swede comedy "Dolly Olsen" will be given. The Kent shows have been in Irma several times before and have always left a good impression with the patrons.

CHURCH NOTICES AND ACTIVITIES

ANGELICAN CHURCH NOTICES
There will be a service at the United Church at 3 p.m. on Sunday, July 26th.

Rev. A. M. Trendell, Vicar
If weather and roads are good it is hoped that any of the congregation who wish to join in with Battle Heights picnic at King's Park on July 25th, will do so. The W. A. will hold a short meeting at the same place. If the weather is bad please try to get to Mrs. Yeend's home where the meeting will be held on July 28th at 2.30.

The W. A. are serving afternoon tea and sale of home cooking on August 1st at Mr. J. Fletcher's Store on Main Street. Any donations will be greatly appreciated.

McGREGOR — BURNS

A pretty wedding of much interest was solemnized at Knox Presbyterian Church, Red Deer, on Tuesday at 2 p.m. when Fanny Douglas, eldest daughter of Mr. and Mrs. Wm. Burns, became the bride of Dr. S. R. McGregor, of Oyen, Alta. Rev. T. Miller officiated.

The church was tastefully decorated with ferns and summer flowers, and the guest pews were marked with bows of white ribbon. To the strains of Mendelssohn's Wedding March, played by Mrs. Helen Moore Dawe, the bride entered the church on the arm of her father, who gave her in marriage. The bride was gowned in ivory satin and Brussels lace; her veil was held in cornet style with orange blossoms, and she carried a shower bouquet of Madam Butterfly roses and lilies of the valley. She was attended by her only sister, Miss Maizie Burns, who was tastefully gowned in powder blue Swiss net over crepe de chine, with picture hat, shoes and mittens in a harmonizing shade of pink, and carried a shower bouquet of pink gladioli. Master Gordon Jacques carried the bride's veil.

The groom was supported by Mr. J. Evans, of Calgary, and Messrs. Clark Houghton and Robert Burns were ushers. During the signing of the register, Mrs. Helen May Warwick sang, "O Promise Me."

After the ceremony, a reception was held at the home of the bride's parents, Mrs. Burns, who received with her daughter, was gowned in black georgette and lace with hat to match, and corsage of cream roses. The bride's table was centered with a four-tier wedding cake surrounded by pink tapering candles in silver holders and pink and silver dragons were used to decorate throughout the rooms. Mrs. A. E. Jacques and Mrs. W. J. Kirkpatrick poured tea, and the Misses Jessie Gunn, Margaret Frew and Elsie Osborne assisted in serving.

The groom's gift to the bride was a sterling silver dressing set; to the bridesmaid, a finger ring; to the best man, a belt buckle; and to the ushers, gold cuff-links.

Dr. and Mrs. McGregor left by motor to spend their honeymoon in the mountains, the bride travelling in a mauve and white fall crepe sports suit with French beaded bag and hat to match.

The bride comes of an old and well-known family in this district, and the groom was in practice in Red Deer with Dr. Parsons for some time, and they will receive the cordial good wishes of many friends on this happy occasion.

The out-of-town guests included: Mrs. J. F. Cooper-Smith, Montreal; Mr. and Mrs. A. E. Jacques; Mr. and Mrs. Wm. Cookson, Miss Margaret Frew, Mr. Irvin Frew and Mr. J. Evans of Calgary; Mr. and Mrs. D. A. Crawford, Ponoka; Miss Elsie Osborne and Mr. Brown, Vulcan; Miss Jessie Gunn, Drumheller; Mr. J. Campbell, Edmonton.—The Red Deer Advocate.

CAMP

Eleven sunburned but happy campers returned on Wednesday afternoon, spending a week at Camp Lake. All report a splendid time and 'glad to get home, are all set to go again next year.

Thirteen local girls left on Wednesday for the girls camp being held from the 22nd to the 29th. They wish to thank Mr. Eldon Fenton for his kindness in taking them up in his truck.

Dr. J. H. Grisdale

DR. J. H. GRISDALE, B.Agr., D.Sc.A., Deputy Minister of Agriculture for Canada, is chairman of the Conference and Programme Committee of the World's Grain Exhibition and Conference and in this capacity is charged with one of the most important phases of the 1932 world-wide event.

Born at St. Marthe, Quebec, in 1870, the son of farming parents, Dr. Grisdale entered the Ontario Agricultural College at Guelph in 1890, and was an under-graduate student until 1907. He completed his studies at the Iowa State College and graduated in 1898 as a Bachelor of Agriculture.

Returning to Canada in 1899, Dr. Grisdale was given charge of the important position of agriculturalist at the Central Experiment Farm at Ottawa. In 1911 he became director of the Dominion Experimental Farms.

Practical knowledge of farming, technical training and a keenly analytical mind are the qualifications that make Dr. Grisdale the logical head of the Federal department experimental farm branch, the largest system in the world devoted to agricultural practice, investigations and research. While director Dr. Grisdale was called upon to act as Dominion field husbandman from 1911 to 1919 and Dominion botanist from 1917 to 1919.

In 1919, when the position of Deputy Minister of Agriculture for Canada became vacant, Dr. Grisdale was appointed and he has held this position since that time, as well as having been acting commissioner of agriculture.

Dr. Grisdale acted as advisor to the Canadian Government in London, England, in 1922, conferring with the British Ministry of Agriculture regarding regulations incidental to the lifting of the cattle embargo, also as agricultural advisor to the Canadian delegation at the 1923 and 1926 Imperial Conference in England. In 1927 Dr. Grisdale headed the Canadian delegation to the Imperial Research Conference in London, and in 1929 represented the Canadian Government on the Imperial Agricultural Bureau Research Council. He is a member of the Canadian Research Council and joint chairman of the council's committee on tuberculosis, as well as of a committee appointed to study the important question of cereal rust. Dr. Grisdale is a Fellow of the American Association for the Advancement of Science, of the American Genetic Association and of the Canadian Society of Technical Agriculturalists.

Sedgewick U.F.A. and U.F.W.A. Convention Held at Loughheed

The Sedgewick Constituency U.F.A. and U.F.W.A. Provincial Annual Convention was held in the Hall at Loughheed on Thursday, July 9th. Nineteen locals being represented. The convention lasted all day until late in the evening, three sessions being held.

Charles P. Hayes of Strone was appointed chairman, and credential and resolution committees were chosen at the morning session.

After lunch the convention re-assembled and Mrs. Zipperer, U.F.W.A. Director, addressed the meeting and was well received.

A. G. Andrews, M.L.A., then spoke at length on the work of the last session of the Legislature, giving a summary of his speech from the Throne. He explained the Bill which he brought in asking for duplicate freight rates for domestic and export, stressing the great difference between the two at the present time. Mr. Andrews went into detail as to the amounts of various expenditures which must be paid out of revenue, as the Mental Institutions, Public Dept. interest, Public Highway maintenance Dept., Adjustment Bureau, Keith Sanatorium. He explained the new Homestead Act and many other Bills which were under consideration or passed during the Session, all of which received the close attention of the meeting.

The Chairman announced that the Hon. O. L. McPherson was unable to be present, and called on Norman Priestly, Vice-Pres. of the U.F.A. to speak in his stead. Mr. Priestly, who is also managing director of the U.F.A. paper, spoke of that publication and the cost of its production, and then spoke on the Co-operative Purchasing Association at length. His address was full of interest and aroused much discussion.

At the evening session, William Halsall, Manager of the Killam Co-operative store, spoke of the progress of that Association and offered to help any of the locals desirous of forming similar associations. J. E. Brown, U.F.A. Director, also spoke on this subject.

Many resolutions were presented and discussed. The Board appointed for 1931-32 is as follows:

Pres., Charles P. Hayes, Strone; First Vice-Pres., Mrs. Wm. Halsall, Sedgewick; Second Vice-Pres., W. N. Bates, Alliance; Directors, North of the C.P.R. Track, B. W. Ash and Wm. Gordon, Viking; Directors South of the C.P.R. Track, I. H. Lewis (Killam), and Mrs. G. P. Remick (Alliance). Frank Grandage was appointed Secretary-Treasurer by the Board.

NEWS ITEMS FROM KINSALLA

The Rodino Athletic Club is holding their annual sports on Wednesday, August 5th, under the auspices of the United Church.

Last year the Club held its first sports and this proved a huge success, so it has been decided to make this an annual event, and the first Wednesday in August of each year was set aside for this purpose.

Brand new grounds have been fixed up and put in splendid shape for the various games that will take place, among which are the following: Baseball, Soft Ball, Football, Basketball, Tennis, Foot Races, Horse Races, Jumping, Etc.

There will be a hot dog stand as well as refreshments both on the grounds. The location of grounds is eight miles north and two miles east of Kinsella.

Word was received here this morning that Mrs. T. A. Lindberg passed peacefully away, at her home about six miles north of Jarrow, late on Saturday night.

Mrs. Lindberg had been in ill health for some time and her passing was not unexpected. She just recently returned to her home from the Viking Hospital where she had been receiving medical attention.

Knut Overbo and Lewis Overbo have returned from a motor trip to Jasper Park, also spending a few days in Edmonton. They report having enjoyed a fine trip.

At a recent meeting of the Lake Vernon school trustees Mr. Wm. H. Pearson of Red Deer was chosen to teach this high school for the coming term. Mr. Pearson comes highly recommended and is the holder of a first class teacher's certificate.

A serious accident happened to Mr. Newton Harvey last Saturday evening, July 18th. Mr. Harvey was assisting with road work and at the time of the accident was standing on one of the frozen logs to help hold it in place while being towed. The frozen log struck a rock and in so doing Mr. Harvey was caught between the cross bar and draw bar, and as a result received serious injuries to his side. It was believed that several ribs were broken as well as badly bruising him. He was rushed to the Viking Hospital for medical attention. The accident happened a couple of miles west of Jarrow.

Extremely heavy rains and often during the past month have left the crops in splendid condition. Crops throughout the entire district show improvement daily, with wheat standing from twenty inches to three and a half feet in height. Quite a number of the fields are completely headed out and the remainder in shot blade. The land has sufficient moisture now and is in need of steady and bright sunshine and hot days to bring the crop along still further. If hail and frost give the area a wide berth, the crop should be a bumper.

WANT ADS

LOST—On Wednesday evening, between Irma and Crescent Hill school, one new 30x3 1-2 Road King tire. Will finder please notify owner—T. Sanders, Phone 214, Irma.

LOST—June 3rd, spare tire, for 4.40 Ford. F. C. Lukens, Irma, Alta., 23-5, C.

FOR SALE—Or will trade for cattle; one Black thoroughbred Percheron Stallion—Wm. Glover, Sec. 33-46-6, with, Fabyan.

FOR RENT—Two room house, opposite Farmers Mutual Lumber Co., in good condition. Rent \$7.00 per month in advance.—H. W. Love, Irma.

TENNIS NOTES

Three local tennis players, Miss O. S. Rush and Messrs. Prickleton and Gamble went over to Loughheed and played in the tournament held there July 20th and 21st. However, they all went down to honorable defeat at the hands of more experienced players. Of course they have all, Prickleton and Gamble took it as was due to a lot of tough breaks, whilst Miss Rush blames it on the mosquitoes. Oh, well, better luck next time.

Plans are under way for a local tournament, so brush up on your playing. By the way, club finances are getting low. Why not get in touch with the secretary if your dues are not yet paid?

WEEKLY REVIEW PROV. MARKETS

BEEF—On the Edmonton market cattle receipts were light while prices held about steady. Choice light \$6@ \$6.50; good \$5.50@ \$6; medium \$4.75 @ \$5.25, common \$4@ \$4.50.

FEEDERS, STOCKERS—A moderate demand has prevailed in this market during the past week, with feeder steers selling at \$3.25@ \$4; stock steers \$3@ \$3.75; stock heifers \$3@ \$3.75 and stock cows \$2.50@ \$3.25.

HOGS—On the Edmonton market bacon hogs sold for \$8@ \$8.25, a slightly lower level this week; select made \$8.50@ \$8.75 and butchers \$7.50 @ \$7.75, fed and watered.

SHEEP—At Edmonton a dull tone has been noted this week with lambs selling at \$6@ \$6.50; ewes from \$2@ \$3.50 and yearlings making \$4@ \$5.

POULTRY—Broiler offerings showing increase, while quality is steadily improving. No. 1 quoted at 12@ 14c for over 2 lbs., while those under 2 lbs. are bringing 10c. Demand inclined to be drabber. Poultry in fair condition and finding market very slow. Prices steady: No. 1, over 4 lbs., 9@ 10c; No. 1, under 4 lbs., 7@ 8c; No. 2, 5@ 6c, and roosters 5c.

EGGS—Receipts only fair, with large number of hot weather supplies offered. Demand holding up very well and market easily cleaned up. Price steady, with extras 14@ 15c; first, 12 @ 13c, and seconds, 9@ 10c.

HAY—Offerings of new upland increasing and price steady at \$11@ \$11.50, despite slow outlet. No new timothy available, while old stocks are bringing \$14@ \$16 per ton at country rates.

FEED OATS—Market very drabgy while supplies are liberal. Price steady at 25c per bushel.

PHILLIPS

A young daughter of Mr. and Mrs. Claff died from an operation due to appendicitis on Thursday, July 14th. The funeral was held on Thursday. William and Edward Gilbertson, Lloyd Harris and P. Syme Jr. acted as pallbearers.

The crops show great improvement and it looks like a bumper crop. The wheat is nearly all headed out and the oats are coming along fine.

On Sunday afternoon the Ribstone Hill Soft Ballers were waiting for the Glenora team to come and play. They didn't come. Later it was discovered that Glenora expected Ribstone to come to them. They all waited in vain. Oh, what a blunder!

The weather during the past week has been ideal for crop development. Owing to the wet weather the past month, with bright hot days the grain making great headway and with a few exceptions the crops will be far above average.

Where Are We Astray?

Out of the present world depression good will eventually come. This prediction can be made with absolute confidence and certainty of fulfillment because lessons are being learned and the need for reforms being demonstrated which will force action resulting in the application of remedies. But at the present moment if the question is asked: What reform is most imperative, what action should be first taken, there are almost as many answers as there are people. There is no agreement as to what has caused world conditions; there is even less agreement as to the course of action necessary to reach solutions and to prevent a recurrence of such depressions. Mankind in its world relationships must have violated some of the fundamental laws of Nature to have brought down upon itself such a world calamity, but, if so, no one appears to be able to put their finger on the spot and declare authoritatively: "There lies the trouble."

All of which leads to the thought and the question whether our much vaunted systems of education are not very much at fault in the very foundations upon which they are erected. Much thought is expended upon the devising of a curriculum, in the preparation of text books, in the academic training of teachers, and hundreds of millions of dollars are expended in school buildings and equipment of all kinds. This has been going on for generations, yet when a world condition develops such as we are now experiencing, and from which we all suffer, the thinking of the world is confused and muddled. Statesmen, economists, financiers, world leaders in all branches of industry, all are at sea; all running around in circles; one advancing this theory as a solution only to be met by another absolutely contrary theory. No one seems to stand on solid ground, able to advance a clear case or an incontrovertible argument.

What is the basic cause of all this confusion? Is it not to be found in the fact that in our educational methods we have failed to ground our people in a true knowledge and acceptance of the immutable laws of Nature, failed to teach people to think, and to think straight, with the result that the world has been devising and trying out all kinds of artificial man-made devices and experiments, many of them in open defiance of Nature's laws instead of remaining true to those laws.

Have we not in our educational systems devoted time and energy on many frills, have we not emphasized a narrow, even hostile nationalism, have we not placed a premium on the so-called higher education and the securing of degrees too numerous to mention, but failed to educate men and women to really think, to accurately weigh and rightly gauge the verities of the world in which we live in the full light and knowledge of those laws of Nature, ignorance and violation of which mean suffering, loss and disaster?

To illustrate: Let any two men meet and begin a discussion of present day conditions, and where does the conversation lead them within a few minutes? They begin by discussing what, its price, the marketing of it, whether there is over-production or under-consumption, the effect of Russia's "Five-Year-Plan" on Canada and the world, and at once they are attempting a discussion in political economy. Possibly they start by talking ordinary partisan politics, and at once they are into a discussion of tariffs, Protection versus Free Trade, currency and banking, trade treaties, markets. In a word, political economy. Or taxation is the subject. They are agreed it is excessive, but there agreement ends. One man favors this method of raising necessary revenues; the other has directly opposite views. Again it is political economy. Or possibly they begin a discussion of religious creeds or the racial origins, characteristics, and emigration of people, and they land in political economy.

But how many understand political economy which is affecting every nation, every home, every life today? What have our schools really taught us about it? Practically speaking, nothing. It is left as a study for the limited few who reach the higher grades, the colleges and universities, and even then it is the odd one who obtains more than a hazy idea of it.

Notwithstanding this universal ignorance of even the primary principles of the subject, we are today all talking, or attempting to discuss, political economy. The present depression has made it the current topic of conversation, the language of the street, the office and the home. And what do we know about it? How profoundly ignorant we are, because of this universal ignorance, every quick proposal, every quixotic idea, gets a hearing, and in various quarters acceptance as a cure-all for our troubles.

The question presents itself: Should the study of political economy not be made the most fundamental of all studies for the youth of today, commencing early in the lower grades and continuing through our educational system? Let us study the verities of life; above all let us teach and train the coming generation along more practical lines, and instead of striving to cram a vast amount of information on certain given subjects into their young minds, ground them in the truth and beauty of Nature and Nature's laws and then train them to think for themselves and apply those laws in every activity of life, individually, nationally, internationally.

Famous Estate For Sale

Glencoe, Lord Strathcona's famous estate in Scotland, is for sale. It covers more than 75 miles, its boundaries stretching 22 miles from Loch Leven to Ramoak. Glencoe was the scene of the 1692 massacre of the MacDonalds. The sentinel rock, from which the signal for the massacre was given, is on the property.

No Of Importance

Social Visitor: Of course, closing the saloons has raised your husband's standing in the community.

Mrs. Dooley: Sure, an' it's the other way, mum. In the old days Mike was pointed out by everyone as the village drunk, but now you'd think he was just nobody.

Vegetable oils are said to be a good fuel for some Diesel engines.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes: "I am the mother of seven, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die. "My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again. "My other children also had diarrhoea, and at that time I gave them 'Dr. Fowler's' with the same results."

Millions For Relief

300,000 Persons Given Employment Through Public Works

Expenditures throughout Canada on public works arising out of the \$20,000,000 unemployment relief grant made by the Dominion Government in the special session last fall had reached a total of \$70,655,000 at the end of June. A statement issued by the labor department shows 309,000 persons were given employment with a total of 6,637,000 man-days of work.

By provinces the division of expenditures was: Prince Edward Island, \$200,000; Nova Scotia, \$2,338,000; New Brunswick, \$1,452,000; Quebec, \$10,964,000; Ontario, \$15,556,000; Manitoba, \$2,563,000; Saskatchewan, \$2,900,000; special relief for drought areas in Saskatchewan, \$1,014,000; Alberta, \$2,839,000; British Columbia, \$3,423,000.

In addition the Canadian National Railways carried out work amounting to \$14,113,000, the Canadian Pacific Railway, \$11,514,000 and \$2,465,000 was spent through the grade crossing fund.

Up to the end of June, 88,000 families had been given direct relief. Where returns were made to the department on the basis of persons receiving direct relief the total was in the neighborhood of 390,000.

Expense of the special works undertaken to relieve unemployment was provided one-quarter by the Dominion, one-quarter by the provinces, and the balance by the municipalities.

Peace Motion Tabled

Proposal of Miss Agnes MacPhail Disapproved By Committee

Proposal of Miss Agnes MacPhail, Progressive member for South East Grey, to establish professorships and scholarships in Canadian universities to promote peace was disapproved in a report by the industrial and international relations committee tabled in the House of Commons.

The committee had under consideration a resolution by Miss MacPhail that "in the opinion of this House, for every \$100 spent for war, one dollar should be spent to promote peace by instituting international professorships and scholarships in the leading Canadian universities."

Persian Balm is irresistible. Fragrant summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a peevish aid to lovely complexions. Used by men as an effective hair fixative or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

Willing To Oblige

A Philadelphian man called up a birdstore the other day and said: "Send me 30,000 cockroaches at once."

"What in heaven's name do you want with 30,000 cockroaches?" "Well," replied the householder, "I am moving today and my lease says I must leave the premises here in exactly the same condition in which I found them."

Poison Ivy is not ivy at all, but was so-called by Captain John Smith who encountered it, with unpleasant results, and thought it resembled the English ivy.

A Spaniard introduced tobacco into Spain from the West Indies in 1559.

ABANDON PACIFIC OCEAN FLIGHT

Inability to manage the plane, "Fort Worth," in heavy winds with more than 300 gallons of gasoline, was given by Reg. Robbins (left) and Harold S. Jones, Texas aviators, as the reason for abandoning their Seattle-Tokyo flight. The fliers reached Nome, but decided not to continue their 5,100-mile hop to Japan.

Will Erect Seadromes

Trans-Atlantic Air Lines Soon To Be In Operation

The first of eight seadromes, proposed man-made islands to dot the Atlantic at intervals of 380 miles between the United States and Great Britain, will be constructed off the coast of United States next spring, Captain Hugh Duncan Grant, meteorological consultant to the promoters of the project, announced recently.

Grant, visiting in Akron, Ohio, predicted that within a year from the placing of the first seadrome the other seven ocean landing fields will be completed and a trans-Atlantic air line in operation.

The seadromes, Captain Grant explained, will have a six-acre deck, which will be 70 feet above the water surface, or 30 feet higher than storm waves. The seadromes will be buoyed by air tanks extending 40 feet below the surface. Ballistic tanks, filled with pig iron and giving the seadromes their stability, will extend 177 feet downward.

Australia's New Stamps

Unique Design Commemorates World Flights Of Kingsford-Smith

After some delay Australia has issued the Kingsford-Smith stamps to commemorate his world flights. The set consists of a two pence red, and a three pence blue. There is also a six pence deep mauve, issued for air mail service. Each of the three stamps have the same design, an aeroplane flying between the two hemispheres, with the inscription "Australia" at the top of the stamp, and "Kingsford-Smith's World Flights" at the bottom. The values are in small oval tablets in the lower corner, and the word "postage" at each side. The only difference in the air mail stamp is that instead of the words "postage" on each side, the words "Air Mail Service" are inscribed. When these commemorative stamps were placed on sale in Melbourne the six penny air mail was bought so heavily, that the supply was exhausted within fifteen minutes.

An Unusual Convention

Four Hundred Divers Of Water Attended Meeting In Italy

Four hundred divers, including professors, physicians, priests, workmen and several women attended the first congress of rhabdomyancy—diving of water, precious metals, etc.—at Verona, Italy, recently. In order to test the delegates' capacities, a commission of engineers dug nine holes ten feet deep in the municipal stadium and buried in them metals and pipes containing running water. Armed with rods, willow, or metal, the divers discovered all the spots. Professor Mercati, of the Rome University, declared that he was so sensitive that he was obliged to wear rubber-soled shoes to avoid disturbing sensations when he was walking about.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Plan Visit To Russia

Visas have been granted by the Soviet Government to George Bernard Shaw, Lady Nancy Astor, and a party of distinguished Britons who have announced their intention to visit Russia this summer.

Penalty, For Nude Paraders

Three Years' Imprisonment May Be Imposed Under Proposed Amendment

Three years' imprisonment for parading while nude may be imposed under an amendment to the criminal code which will be introduced in the House of Commons shortly by Hon. Hugh Guthrie, Minister of Justice. The amendment is proposed with a view to putting a stop to nude parades by Doukoffors of western Canada. It is comprehensive in its character. In the first place it provides a penalty of three years on summary conviction for nude paraders. The same penalty may be imposed on anyone found nude in any public place, found nude on private property not their own, or found nude on their own property exposed to public view.

The term "nude" is defined in the amendment as being so scantily clad as to be indecent.

Utilize Muskeg Vegetation

Edmonton Firm Manufactures Building Insulator Material From Muskeg Litter

Commercial utilization of muskeg vegetation, plentiful enough in Northern Alberta, is seen as an immediate probability following the development of a new building insulator called "Moostex" by two Edmonton men. An Edmonton lumberman, J. Victor Carlson, and his son Arthur V. Carlson, are stated by the Edmonton Journal to have perfected a process by which ordinary muskeg litter is transformed into fine quality of insulation material. Experimental work is stated to have advanced sufficiently for the new product to be offered to the building trade.

Stimulate Fishing Industry

Hon. D. G. McKenzie, Minister of Mines and Natural Resources in the Province of Manitoba, is personally visiting fishing settlements along Lake Manitoba collecting data concerning the problems with which the men engaged in the fishing industry are being faced and to formulate plans for putting the fishing industry on a better basis.

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

Credit For Unemployed

Pending the commencement of unemployment relief works on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food, credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

British Trade With Russia

Export Credit To Be Extended For a Period Of 30 Months

In a move to increase British exports to Soviet Russia, the British Government announced Thursday, July 9, 1931, through William Graham, president of the Board of Trade, that exports credit will be extended for a period of 30 months instead of 24 months as at present.

This arrangement will be limited to heavy engineering products. The British move has resulted from other European countries, notably Italy, having extended their export credit schemes for Russia to 30 months.

The announcement, made in the House of Commons, disposes of reports in the British press in the last few days that the Labor Government planned to extend a new credit of approximately \$30,000,000 to Russia. It was learned authoritatively that British exports credit arrangements for Russia remain unchanged except in relation to the extension of time limit. The 30-month limit includes the period of manufacture.

A Live Stock Safeguard

Restrictions Placed On Importations Of Stock From Countries Infected With Foot and Mouth Disease

With official confirmation of outbreaks of the dread foot and mouth disease in England, Scotland and Ireland, it has become necessary for the Dominion Department of Agriculture to exercise the powers conferred upon it under and by virtue of the Animal Contagious Diseases Act, and cancel all permits issued for the importation of cattle, sheep, goats, and other ruminants, and swine from the countries infected with foot and mouth disease. While shipments actually embarked as on the date of the official order, June 20, 1931, will be allowed to proceed to Canadian ports, the issue of permits has been held up for an indefinite period.

A pleasant medicine for children is Mother Graves' Worm Expeller, and it is excellent for driving worms from the system.

New Serum Discovered

Discovery of a new small-pox serum was announced recently by the British Medical Research Council, reporting the researches of Professor William John Tulloch and Dr. James Craigie. The serum enables a definite diagnosis in early stages of suspected small-pox, when the symptoms are otherwise doubtful.

W. N. U. 1899

Brief Outline Of Regulations Governing The Admittance Of Tourists To Canada

An outline of Canadian regulations governing admittance of tourists may be of timely interest. A non-resident, visiting Canada for purposes of touring permit for his automobile for health or pleasure, may obtain a period not exceeding sixty days without bond, which may be extended for another thirty days on making application to any Collector or Sub-Collector of National Revenue, and satisfying him as to the bona fides of the applicant as a tourist. If the visitor desires to extend the period to six months he may do so by giving a bond.

Under revised regulations guns, rifles, fishing tackle, golf clubs, cameras, etc., previously used by a tourist, and brought in for his personal use and actually in his possession at the time of his arrival in Canada, together with dogs and other animals imported for hunting purposes or as pets, are admitted without deposit, the only requirement being that they should be reported at Customs on arrival at the frontier, in accordance with the regulations.

The term "cameras" includes not only still picture cameras, but motion picture outfits, the property of bona fide tourists, brought in for their own use for a temporary period, and not for any business or commercial purpose.

Canoes, outboard motors, tents, camp equipment, phonographs, radios, musical instruments, etc., brought in for a tourist's personal use, and not for gain or hire, are admissible upon a sum being deposited equivalent to the duty and taxes payable on the goods, each deposit being subject to refund upon identification and exportation of the articles under Customs supervision within six months from time of entry.

"Statements circulated in the United States that servants of American tourists and visitors to Canada are not being allowed to enter the Dominion this year are absolutely untrue," states Hon. W. A. Gordon, Canadian Minister of Immigration and Colonization. "American tourists and visitors have always been allowed to bring their servants into Canada and they may continue to do so. The only persons likely to find any difficulty in crossing the International Boundary are aliens who are in the United States illegally or in that country under temporary status, as the question of their re-admission to the United States would arise, should they try to return there."

Hon. Mr. Gordon said that Canada extends a cordial welcome to bona fide United States citizens coming to Canada as visitors and tourists, and Canadian Immigration officials at International Boundary points are instructed to facilitate their entry to the Dominion.

The Tourist Industry

Fald \$45,000,000 In Revenue To the Government Last Year

Canadian motorists and visiting United States tourists travelled over nine billion miles of highways in Canada last year, used approximately half a million gallons of gasoline and paid a direct revenue to the provincial governments in the form of gas tax, auto and drivers licenses, aggregating nearly \$45,000,000. These figures, says a statement issued by the Dominion Department of Trade and Commerce, indicate the important rank the automobile and petroleum industries hold in the economic life of Canada.

Automobile registry in Canada last year numbered 1,239,888 vehicles of which 1,047,494 were passenger cars. These figures indicate there was one vehicle to every eight persons in the Dominion.

Another good thing about radio concerts is the lack of encores.

"I have known you such a long time, and this is the first time you have ever danced with me."
"Yes, it is Lent, and I am denying myself pleasures," Moustique Charleval.

W. N. U. 1899

Silver Fox Breeders

Annual Meeting Is Held At Summerside, With 400 Members In Attendance

Approximately 400 members of the Canadian Silver Fox Breeders' Association, representing nine provinces of Canada, and other countries, assembled recently at Summerside, P.E.I., for their annual meeting.

The presentation of the directors' eleventh annual report showed that during the past year the membership reached a total of 6,886, an increase of 822.

During the last inspection season 99,616 puppies were marked by inspectors and 92,825, the largest number in history, were examined. The number transferred during the year was 28,945, also a high mark. The number of pelts consigned to the marketing department showed a healthy increase, numbering almost 22,000, double the number recorded the previous year. Special auction sales held in Montreal for the South American market and in Paris and London, England, for the European market were dealt in with the report.

(By Annette)

CAPE LENDS CHARM AND YOUTHFULNESS

You'll like this slender model immensely. It's a lovely patterned crepe silk in smart red and white colouring. The low placement of the circular skirt flounce joined to the upper part of the dress in diagonal outline gives the figure a charming lengthened line. The narrow tie-belt holds the dress snugly to the figure at the natural waistline. Being adjustable, it may be worn at a point as best suits its wearer.

The miniature view shows how utterly chic it is with cape collar.

Lovely fabrics for its development are chiffon prints, pastel flat washable crepe, shirting silks, cotton mesh, and linen.

Style No. 829 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 3 1/2 yards of 39-inch material with 2 1/2 yards of ruffling.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

"My husband and I attend to our budget every evening. It is more economical."

"How so, dear?"

"By the time we get it balanced it is too late to go anywhere."

Ridiculed For Using Ancient Wooden Plough

But Farmers In Sussex, England, Know What They Are About

Although ploughs, like other agricultural implements, have been subject to many alterations and improvements in the course of centuries, it is remarkable at least that in some parts of England the most popular pattern of plough is still one which can differ but little in its general character from the very first implement of the kind that was ever invented. In Sussex and Kent, England, the old wheelless, turn-wrist plough is still very much in favour, and there is a very good reason for its popularity. On heavy land any sort of wheel except that of a wide and necessary cumbersome type cannot be of much service because it tends to dig into the ground when the soil is wet and causes the plough to "jump" when the surface is hard and dry. Sussex ploughs of this kind are invariably made of wood, there being practically no iron about them except the shoe on the tip of the share and the necessary nuts and bolts.

The wooden share has the advantage on heavy land that it does not smear out the soil in the furrow like a wholly iron share, but tends to break it up. The Sussex farmer has often been held in ridicule for his persistence in retaining the wooden plough, but we may take it that he knows what he is about.

Empire Marketing Is Becoming More Popular

Annual Report Of Board Shows Trade Is Increasing

The world-wide economic depression has not arrested the growing habit in the United Kingdom of buying within the Empire.

The annual report of the Empire Marketing Board reveals that trade from Canada and New Zealand reached a record quantity in the past year, those from Canada exceeding two million hundredweight, against a previous record of 1,869,000 hundredweight in 1923. In 1930, 64,000 hundredweight of Canadian pears were imported as compared with 60,000 in 1928.

Parliament has been asked to provide \$3,295,000 for the board's activities during the coming 12 months. The policy of making grants for scientific research work both at home and abroad is being continued. Among grants already made are sums for the University of British Columbia for research on cheese ripening and research on the cost of transport of pedigree livestock; to the Ontario Agricultural College at Guelph in connection with egg production; and to the Newfoundland Government for fishery research.

Edmonton Exports Butter

Fifty-Six Tons Shipped To The Liverpool Market

Edmonton recently re-entered the export butter market with the shipment of fifty-six tons of creamery butter from the Woodland plant in Edmonton to Liverpool market via the Canadian National and Elsie Star lines over the Panama route in special refrigeration equipment. It is expected that the two carlots of one thousand boxes each will be followed by a second shipment in August via the Panama to Glasgow market.

It is five years since Alberta was forced to retire from export markets in the Orient for lack of surplus, but E. T. Love, managing director of Woodland Dairy, will send one thousand boxes to Shanghai soon.

Production for the first half of 1931, in all Alberta, has increased 46.3 per cent. over same period last year with the output to date 6,775,000 pounds for 28 weeks.

Three scientists in France have discovered that a common Paraguayan plant, known as "kaabe," contains 300 times more sugar per gram than sugar cane.

Valuable Tree Destroyed

Diamond Willow Rooted Out By Land Clearers In West

Growing in sections of the west is a valuable species of willow called the diamond willow, which is being destroyed in bush fires along with the ordinary brush willow. In clearing the land to provide more acreage for wheat raising, this valuable species is rooted out.

The reason for this is that few people know the diamond willow when they see it. The distinguishing marks are so cleverly hidden under the bark that only a close observer would notice them. When the bark is trimmed away a diamond shaped spot is seen, sometimes oblong or nearly square, singly or in clusters.

There is a noticeable awakening to the possibilities of this tree in the making of furniture. A beautiful diamond willow setttee has been placed on exhibit at the Edmonton Technical School to arouse the interest of the boys in the wood working department. Diamond willow furniture is also being sold by a large store in Edmonton.

The Old Fashioned Pattern

Was Still Used In Some Parts Of England Half Century Ago

A writer's description of the English people "walking dryshod with iron machines on their feet," has puzzled many readers whose memories do not go back half a century. The description, no doubt, applies to the pattens that our grandmothers, or their servants, used when "swilling" a yard, and sometimes in the streets in wet weather, when mud and puddles were much more plentiful than today.

The patten was strapped to the boot and consisted of a wooden sole, attached to which by short iron legs was a metal ring, oval in shape, which raised the feet two or three inches above the road, and thus kept them clear from wet mud. They were still in fairly common use in some parts of the country half a century ago.

Not long ago, a correspondent read a notice in the church porch at Trent, near Yeovil, which said: "All persons are requested to take off pattens and clobs before entering the church."

Alberta Fox Farms

Two Hundred and Three Fox Farms Are Now Licensed In The Province

Addressing the annual meeting of the Alberta Silver Black Fox Breeders' Association in Calgary the other day, Benjamin Lawton, Alberta's chief game warden, pointed out that although the industry is a new one it is making rapid headway. In 1921 there were only 12 fox farms in the province, he said, while in 1929 there were 203 such farms with 13,000 animals.

B.C. Eggs For England

A shipment of three thousand cases of thirty dozen each of British Columbia eggs were shipped recently from New Westminster to London, England, by the British Columbia egg pool. This is the first export shipment of eggs since 1929. It will be the first of several shipments this year. Prices in the Old Country are said to be fair.

Prince Has New Sport

The Prince of Wales has taken up a new sport—motorboating. He has ordered two new racing boats, but the manufacturer of the craft said the prince will not contest in open races but probably will organize competition among his flying and motorizing friends.

A fire engine of German invention pumps streams of carbonic acid powder that smother flames instead of using water.

"Is Bernice Happily Married?"

"Yes, indeed, her husband's away most of the time."

PERFORMS UNUSUALLY WELL AT ROYAL AIR FORCE PAGEANT

"The Royal Air Force Pageant" produced annually by Britain's fighting air force, once again proved a great success and was a feast of thrills for the hundred thousand spectators. This picture shows the queer, fish-like "Pterofacety," one of the quaint machines which took part in the Pageant. It has a speed of 110 miles an hour, carries three passengers, has no tail, and has the engine and propellers behind the pilot. One of its best qualities is that it is foolproof.

Steamship Beothic Is Again Starting On Annual Trip To Posts In Arctic Archipelago

Work Up To Schedule

Churchill Will Be Ready For Grain Shipments This Fall

Preparations are going along satisfactorily for the trial shipments of grain this fall out of Churchill.

The ice-breaker N. B. McLean, left Quebec recently to take up her duties along the route and the work on the port facilities is well up to schedule.

No official announcement has yet been made as to the terms under which the test shipments carrying between 500,000 and 750,000 bushels of wheat will be made.

The understanding is, however, that because of the route being new, the insurance rates consequently high, and the trips being of a special nature as far as the ships participating are concerned, the charges per bushel in the ordinary course would be somewhat higher than via Montreal.

The government, it is expected, will be prepared to assume the additional costs for these shipments so that it will not cost the shipper any more than the Montreal route.

Consideration is being given, according to reports, as to who will be the shippers. Some companies with trademarked wheat products are said to have applied for permission to ship the first wheat by the port, but that the government does not take kindly to the trials being used to advertise any particular company. So far, according to reports here, none of the big shippers or the pools has made a decision in the matter.

The insurance rates announced from Regina, are the same as those made public by the Department of Marine in May. Hopes are expressed that after the trial shipments have been made and there is more tangible evidence to go before the shipping commission with, lower insurance rates will be obtained.

Good Canned Goods

Government Commercial Inspection Service Ensures Uniform Quality

Summer is the season in which the camper and tourist hold away throughout the length and breadth of the land. It is also the time of the year when, perhaps more than at any other, canned goods are in demand. It is during this season that the travelling and camping public come to realize the true worth to them of the commercial inspection service supervised by the Fruit Branch of the Dominion Department of Agriculture. Under this service all canned products of field, orchard and farm are put up under close inspection, and each individual container in addition to conforming with a specific size must be clearly marked with the true quality of the product it contains. There are three grades of quality defined by statute. These are—"Fancy" which is the highest grade and as nearly perfect as possible; "Choice" which, while not quite so perfect in appearance, is, as the term implies, a real good quality for the product; and "Standard," for use where appearance is not the principal consideration, and which provides high food value and good flavour at little cost.

A Fallacious Opinion

The St. Thomas Times-Journal recently published a timely editorial pointing to the fallacious opinion held by so many people that the best of surgical attention and nursing care is found only in the largest cities of the continent. The St. Thomas paper puts in a word for the smaller hospitals like those in its own city, and also gives credit to the surgeons who are doing just as fine a work in their own small communities, as are the men of great reputations in the metropolitan centres.

The S.S. Beothic carrying the Department of the Interior's 1931 expedition to the posts in the Arctic Archipelago will sail from North Sydney, Nova Scotia, on July 29. The date of this year's sailing is practically the same as last year and from experience it has proved the most satisfactory for the carrying out of the work of the patrol.

This year's expedition by officers of the North West Territories and Yukon Branch will be in charge of Major L. T. Burwash, an Arctic explorer of long and wide experience. Captain E. Falk will again be ship's master while Captain J. D. Morin will be the ice pilot. Dr. L. D. Livingstone, Medical Health Officer of the Branch will be ship's doctor on the voyage as far as Pangnirtung, where he will replace Dr. H. A. Stuart, who has completed a two year period among the natives of Baffin Island. Dr. Stuart will sail as ship's doctor on the return voyage.

Inspector A. H. Joy and four constables of the Royal Canadian Mounted Police will accompany the expedition to effect changes in the personnel at the posts visited. Members of the force who have completed their tour of duty will be relieved. Two of the constables going North will remain at Pond Inlet at the northern end of Baffin Island; another will relieve one of the two stationed at Bache Peninsula, Ellesmere Island; and the other will replace a constable who sailed from Lake Harbour, southern Baffin Island.

The same itinerary as last year will be followed, with the first call being made at Godhavn, Greenland. The "Beothic" will then be headed north along the Greenland coast for the farthest north post of Bache Peninsula on Ellesmere Island. By following this route much time is saved and the dangerous middle ice pack of Baffin Bay is avoided.

On the return trip the first stop will be made at Dundas Harbour, Baffin Island. Although not yet definitely decided, it is possible that after completing the work at this post, the "Beothic" will return westward into Lancaster Sound to again attempt to reach Winter Harbour, Melville Island, to re-provision the cache established at that point by the 1908-09 expedition. Last year heavy ice conditions prevented the "Beothic" from reaching Winter Harbour. If it is decided to make this patrol, caches will be laid down at Beechey Island off the southwest corner of Devon Island, and at Cape Cockburn, Bathurst Island. These will be for the use of Royal Canadian Mounted Police patrols and others travelling in the area.

Returning eastward to Baffin Bay, the ship will call at Pond Inlet, River Clyde, Pangnirtung, and Lake Harbour, Baffin Island; Chesterfield, Hudson Bay; and Port Burwell, Hudson Strait. The work of re-provisioning the posts and effecting changes in the personnel will then have been completed and the "Beothic" will turn southward for the final leg back to North Sydney.

Modifies Ban On Motor Cars

Bermuda Will Allow Motor Ambulances To Be Operated

The Island of Bermuda has further modified its ban on motor cars to the extent of allowing two motor ambulances to be operated. The Bermudian government decided to relax its stringent law pertaining to motor vehicles as a result of an accident to the horse-drawn ambulance while it was rushing to remove fire-fighters overcome aboard a burning liner. Because of this mishap private carriages had to be commandeered to remove the fire fighters suffering from the smoke and intense heat. At one period during the fire twenty men were lying about waiting for ambulance.

The Chilean government has announced that it will avoid a budget deficit.

"How much is that canary?"
"Two pence, but you let me have it cheaper!"
"No, madam. That is factory price."—Buen Humor, Madrid.

RIDING IN THE CLOUDS

The pictures show: a typical trail ride, camp scene, fording a river, and the sterling type of cowboy, who is guide, friend and counsellor to the disciples of the saddle.

Up, out and away from the cares and limitations of modern life; sharing the joys of long days in the saddle in flower-studded Alpanis and stately passes with a goodly company of kindred spirits; happy evenings round the campfires and restful, health-giving nights in the wine-like atmosphere of the mountains; such is the life of the Trail Riders of the Canadian Rockies, on their annual expeditions from Banff and Lake Louise, which have long since become famous items in the summer programs of the two great Canadian Pacific Rail-

way hotels at these renowned holiday places. Carefully planned rides, of varying durations to suit all corners; experienced guides, cooks and horse-wranglers; a pack train always ahead to welcome the riders at the evening meal; with the night's camp all ready for occupation; horses that are as sure-footed as goats all contribute to making this form of holiday one of the most original and enjoyable on the American continent. Canadian Pacific lines carry enthusiasts and new recruits from the four corners of the earth to Banff and Lake Louise, each summer. This year the official four-day ride

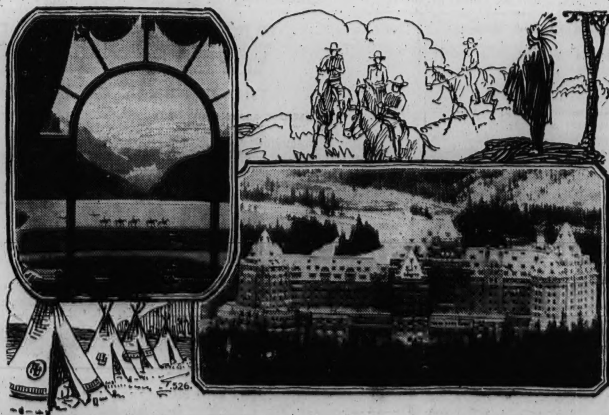

will be held from July 30 to August 2, covering 124 miles through Banff National Park, in territory with special appeal to the photographer and fisherman, and will be followed by a 10-day ride of greater mileage.

Governor General's Arrival

Precedent demanding that Lord Bessborough shall become "His Excellency the Governor-General and Commander in Chief" at Halifax where he will be sworn at the historic Province Building. Captain H. Sibbons, R.N.R., commander of the Canadian Pacific liner Duchess of Bedford will divert his vessel from her regular course and call at the Nova Scotian capital to land the vice-regal passenger Easter Saturday. The lay-out shows Lord Bessborough; Lady Bessborough, the former Roberte de Neufville, only French born peeress of Great Britain; Captain Sibbons, one of the most popular captains on the Atlantic and the Duchess of Bedford, 20,000 ton liner—largest Canadian vessel to call at Halifax.

The Rockies Are Calling You

The combination of the extremes of natural and sophisticated at Banff Springs Hotel and Chateau Lake Louise, which open May 15 and June 1, respectively, until September 30, is perhaps the secret of their charm. Located in the heart of the finest scenery of the continent—mountain, lake and forest—each offers to the visitor everything that the most ritzy hotel in the most cosmopolitan cities of the world can furnish. You may cut dancing to look through huge windows at slices of billion-dollar scenery or you may attire yourself to please yourself and go out for days on horse-back into territory virtually untouched by the

white man and all within a few miles of either hotel. You may live plainly but well on food packed into the wilds by horse or you may dine on exotic dainties drawn from the ends of the earth. You may be strictly formal or you may wander around in plus fours—everything goes, whether you are admiring the moonlight on snow-crowned peaks or listening at your ease to a cosmopolitan dance orchestra playing the latest blue. Anyone visiting either of these hotels has laid in a memory that will last a lifetime. Lay-out shows, left, view from Chateau Lake Louise; lower right, the Banff Springs Hotel.

After Two Postponements Viking Sports Will be Held July 29th

If you don't at first succeed, try, try, again. This motto must have been written expressly for the Viking Agricultural Society to give a real trial to see if it works.

After two unsuccessful attempts to hold a sports day that had to be called off on account of rain and wet roads, namely on July 1st and July 15th, the directors and president of the Fair Association held a meeting on Wednesday afternoon and decided to make one more attempt to hold the annual sports. The date was set ahead two weeks which will now be Wednesday, July 29th.

It is hoped that with the prolonged wet spell, for which everybody is thankful, the fair management has at last hit upon a day that the rainmaker will not be at home, but visiting in some neighboring district that needs the moisture.

Practically the same program that was advertised for July 1st and 15th will be run off, and that means that there will be something doing every minute from 12 o'clock noon on until the wee small hours of the morning. It is hoped that the stores will be able to close at twelve sharp so as to get the crowds out to the grounds and have the sports start on time.

Make this the family holiday.

WORLD HAPPENINGS BRIEFLY TOLD

Eight Russian army officers were killed in an airplane accident near Alabino, 30 miles west of Moscow.

Edmonton land sales for the first quarter this year amounted to \$15,000 more than for the same period last year.

In Parliament Prime Minister Bennett said he did not expect to hold the position of Finance Minister at the next session.

All mail contracts of which expiry notices on July 15 were issued by the post office department several weeks ago, have been extended until August 15.

Charles A. Lindbergh has been granted permission by the radio commission to operate a transmitter aboard his airplane on his projected flight to Japan.

Jute factories in Dundee, Scotland, are at work making a million sugar sacks. The sacks have been ordered by the government and are to be completed by December.

Organization of self-contained labor camps in the north of Canada was proposed in a resolution passed at Hamilton by the central branch of the Canadian Legion.

Announcement is made of the appointment of Lieut.-Gen. Arthur G. Wauchop to be high commissioner in Palestine, succeeding Sir John Chancellor, who recently resigned.

Appointment of H. E. Beresford as assistant director of surveys for Manitoba and Alfred Bedford Howell as chief game guardian have been officially announced by orders-in-council of the provincial government of Manitoba.

Strange News From Holy Land

32,000 Horse-Power Plant To Supply Electrical Energy In Biblical Towns
Here is strange news from the Holy Land. The first hydro-electric plant on the River Jordan south of the Sea of Galilee will soon be in operation. It was built partly by American capital and by next year its 32,000 horsepower plant will be supplying current to such Biblical towns as Jaffa, Haifa, Nazareth and Beersheba. Meanwhile the British are building a generating plant that will supply Jerusalem, Bethlehem and the surrounding region. Before long the mountain streams of Lebanon will be producing 51,000 horsepower.—World's Work.

Barley In Canada

Barley is the hardest of all cereals and can be grown through a greater range of climate than any other. Its production dates from the most ancient times when it was used principally as an article of food, but as the years progressed the uses became varied. The production of barley ranks third among the cereal crops of the Dominion in acreage and total yield and second in average yield per acre.

Preserving Our Scenic Wealth

To preserve some share of the wild places of the land in their primeval condition is the object of the National Parks of Canada.

"We will be married on Saturday." "Impossible. I am playing football that day."—Buen Humor, Madrid.

FITTED BODICE GIVES DEMURE QUAINNESS TO PINAFROCK

This cute pinafore frock is a favorite with the tiny little French tots of pre-kindergarten age.

It is accompanied by bloomers that show good taste by peeping 'neath the dress.

The fitted bodice is the cutest ever. The bow-tied sash emphasizes the fact. The attached skirt displays soft gathering that gives a comfortable hem fullness.

Style No. 212 is designed for the 2, 4 and 6 year old. It's all so simple to fashion it. And when it's so practical, why not have young daughter wear French clothes? Sprigged dimity, dotted batiste, floral patterned wool challis, gingham checks, striped percale, wool jersey and linen in sports or handkerchief weight are fetching materials for this little outfit.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Blame Rests On People

Present Depression Has Been Caused By Human Errors

No greater mistake can be made than to imagine that the world depression was produced by mechanical forces too mysterious to be explained. A combination of many causes, active over a long period, culminated in the depression, but they are all identifiable as human errors, in which governments and peoples have persisted, in spite of warnings of inevitable consequences. Recovery will not be achieved by resting in the security of dogmatic theories, but by repairing the mistakes in public and private conduct by which the world has again been plunged into misfortunes exactly similar to the bitter experiences of successive generations in the past.

A portable X-ray has been designed to enable a physician to learn at once the extent of a patient's injuries who has been hurt in an accident. The machine is carried to the scene in the ambulance.

History Of The War

Official History Of Canada's Part In Great Struggle Is Under Preparation

No date can be given at present as to when other volumes of the official history of Canada's part in the great war will be ready for publication, according to a reply given in the House of Commons by Hon. D. M. Sutherland, Minister of National Defence, to a question asked by H. E. Spencer (U.F.A., Battle River).

It is not known how many other volumes will be published. The compilation of these is included in the duties of the historical section, general staff.

"As it is now ten years since the above order-in-council (P.C. 1462) was passed, authorizing the history to be written, how much of said history is now actually written other than the history of the medical services; and when it is anticipated any other volumes will be issued?" Mr. Spencer asked.

The minister's reply was: "In addition to the heavy preliminary work of collection, classification and co-ordination of relative documents and material, which is well advanced, the following progress has been made:

- (1) "The plan for all of the general volumes has been laid out;
- (2) "The material for four of them has been selected and arranged;
- (3) "One hundred and four detailed maps of operations required for illustration, showing units down to squadrons, batteries and companies, have been compiled from original documents;
- (4) "The draft text of approximately one-quarter of these volumes has been written."

Many Are Applying For Naturalization

In Order To Take Up Land In Northern Saskatchewan

More than one hundred applications for naturalization have been received at Regina courthouse. These will be heard by His Honor Judge Hamon in September and November next.

It is understood that one of the main reasons for this unusually large number of naturalization applications is the steady trek of farmers from the dried out areas of southern Saskatchewan to the northern part of the province. Many of these farmers have never become naturalized and have been informed by the Department of Natural Resources that they must become naturalized in order to take up land.

Provincial land regulations which came into effect March 11, 1931, require that a man must be a British subject and have been a resident in the province four years before he is in a position to take up land.

Communicating With Planets

Nicola Tesla Discovers Means Of Transmitting Energy From One Planet To Another

Nicola Tesla, the inventor, in an interview on his 75th birthday, said after years of research he had discovered a means of transmitting thousands of horsepower of energy from one planet to another, which he believes will open the way for interplanetary communication.

"I feel," he said, "that we are nearing a period when the human mind will perform greater wonders than ever before. This is due to the continuous refinement of means and methods of observations and the ever increasing delicacy of perception."

Noted Chemist Dead

Sir Charles Bedford Was Once Technical Adviser To Indian Government

Sir Charles Henry Bedford, distinguished chemist, died at his home, July 8, at the age of 65. He was technical adviser to the Indian government for many years on chemical affairs. He founded the King Alfonso chair of Spanish studies at Oxford University and the Anglo-Spanish and Spanish-American Institute in London, England.

Scotland's Population Is Less

Preliminary census returns for Scotland show a fall from 4,882,000 in 1921 to 4,842,000 now. This is the first time a decrease in Scotland's population has been officially recorded, and migration is given as the reason. Gaelic speakers number 137,000, of which 7,000 cannot speak English.

"Keep hold of the cord of laughter's bell. And avoid the tones that jar; The sound of a sigh doesn't carry well, But the lilt of a laugh rings far."

Some of the textiles made in prehistoric Peru rank among the finest that have ever been produced.

Electric refrigerating plants are to be built in Italy.

Passing Of Trader Moberley

Was Link With The Very Early History Of The West

H. J. Moberley, better known as "Trader Moberley," is dead. Apparently in good health, Mr. Moberley was walking about a few days ago. The end came after a very brief illness, death being attributed to old age, Mr. Moberley being 96 years of age at the time of his death.

Known internationally for his book, "When Fur Was King," Mr. Moberley is believed to have been the only remaining commissioned officer of the old Hudson's Bay Company. He served the company from 1854, when he came west with Sir George Simpson, then governor of the company, till his retirement in 1894, when he was factor at Ile a la Croix Post. Born in Barrie, Ontario, Mr. Moberley was the son of a noted captain in the British navy. His father fought in the war of 1812. Prior to joining the Hudson's Bay Company, Mr. Moberley was employed by the famous British firm of Lloyds and in their service he visited Havana, Cuba, and St. Petersburg, Russia.

He commenced his service with the Hudson's Bay Company as clerk at Norway House under Chief Factor Rowland. Edmonton was his first post and afterwards he was moved to Rocky Mountain Post, later opening up Jasper House as a trading post for his company.

He also at one time was in charge of the posts at Fort Vermilion and Peace River, and established the Fort McMurray post in the early 70's. He was in charge of transports at Portage la Poudre and carried despatches ahead of the Earl of Southesk in 1859 when the earl engaged in a hunting trip through Canada. Prior to taking charge of the Ile a la Croix Post, the veteran trader was stationed at Stanley Mission on the Churchill in northern Saskatchewan.

Houses Good Sized City

Thousands Work Or Live In Empire State Building, New York

One of the biggest houses in the ever-growing world is the Empire State Building of New York. It is a huge structure of steel and bricks and is 86 stories high. About 25,000 people live or work in it. There are 88 passenger lifts for the 86 stories and three kinds of express lifts. Some of these lifts run at a speed of 15 miles an hour. The passenger goes up to the nearest stopping floor to his and then transfers to a slow lift which stops at every floor. Here again, however, he can make the last part of his journey on an escalator, of which there are nearly a hundred. Six lifts entirely for goods are always in busy use.

Use 'Plant' To Locate Minerals

The aeroplane will be employed by Professor J. B. Mawdsley of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Investigation of areas of oil, gas and geostones presenting favourable prospects for metallic minerals will be made.

In catfish families, the father fish assumes the care of the young.

Recipes For This Week

(By Betty Barclay)

LEMON EGGS-NOG

(Serves 1)

- 6 tablespoons milk.
- 1 egg cold water.
- 2 tablespoons sugar.
- 2 tablespoons lemon juice.
- Grated nutmeg.
- Combine milk, water, egg and sugar. Beat thoroughly, pour in lemon juice and mix vigorously. Serve in a large glass topped with a grating of nutmeg.

HONGKONG CHICKEN

- 2 cups cold cooked chicken, diced.
- 1/2 cup celery, diced.
- 2 onions, sliced.
- 1/2 cup crushed pineapple, drained.
- 1 teaspoon sugar.
- Salt and pepper.
- 1 tablespoon butter.
- Brown the celery and onions in the butter. Add the other ingredients. Heat well. Serve with fried noodles.

Manitoba Gold

Province Likely To Replace Yukon As Fourth Producer In Canada

Gold production in Manitoba for the first four months of the year exceeded the total output for 1930 by a substantial amount, and at the present rate of production the province is likely to replace the Yukon as the fourth producer in all Canada. Manitoba's gold output for the first four months of 1931 amounted to 35,928 ounces valued at \$739,540, or at a rate well in excess of two million dollars annually, as compared with an output of 23,189 ounces valued at \$479,359 for the whole of 1930.

More than \$5,000 was collected in one day recently in Edinburgh for the Scottish lifeboat fund.

Funds For Alberta

Settlement Of School Lands Case Is Satisfactory To Province

Close to ten million dollars in provincial assets, with nearly a half million a year in interest for three years, will be coming to Alberta as a result of the settlement of the school lands funds case. Hon. R. C. Reid, provincial treasurer, has been advised from Ottawa that the Dominion Government has issued a three-year debenture for \$9,564,569, bearing interest at 5 per cent. until July 1, 1934, payable half-yearly.

The debentures thus issued to Alberta's credit represents accumulated principal moneys from the sale of school lands since the organization of the province in 1905. All funds from this source have heretofore been handled by the Dominion, which has retained the principal and paid interest to the province. With the transfer of the Natural Resources from Dominion to Provincial control the school lands funds now pass to the province as part of the public domain.

Negotiations leading up to this settlement have been under way for a considerable time past. The conclusion now reached is regarded as highly advantageous to the province, and both Premier Brownlee and Treasurer Reid express themselves as well pleased with the outcome.

Worked In A Circle

Teacher—"Why are days longer in summer than in winter?" Tommy—"Because the sun shines longer."

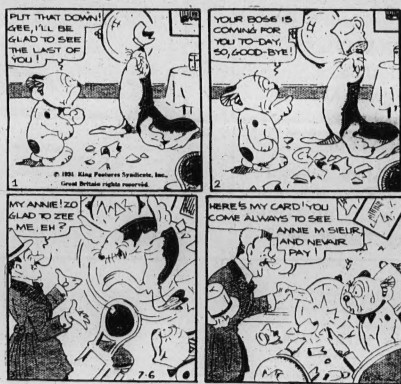

Teacher—"Yes, but why does the sun shine longer?" Tommy—"Because the night is so much shorter."

Cob is an old name for spider, hence the origin of the name cobweb.

Baseball is popular in Argentina this year.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

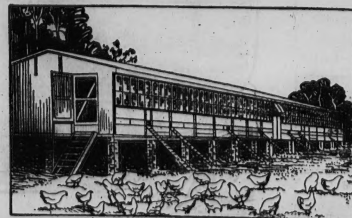

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Try BORDEN'S Chocolate Malted Milk at lunch time

MANY a tired business man has found that a glass of Borden's Chocolate Malted Milk quickly restores depleted energy and vitality.

Proves Loyalty To Empire

Declines To Accept Year's Holiday On Debts Owed To Mother Country

Britain offered South Africa, New Zealand and Australia a year's holiday in the paying off of debts owing to the Mother Country. South Africa has declined to accept the offer, saying that Britain needs the payments to relieve, to some degree, the burden of taxation which her people are carrying.

General Smuts, leader of the Opposition in South Africa, says that South Africa will cordially thank Britain for the offer, but will not accept it because England is suffering from heavy taxation while South Africa is in comparatively good shape.

It is difficult at this time to get a good definition of the British Empire, or to reduce to mere words what it is that holds the thing so securely together. South Africa's action in declining to keep on paying her debts to Britain because the people there are heavily taxed illustrates better than words just what is meant by Empire. And probably the most sincere tribute as to what Empire does is to be found in the fact that General Jan Smuts was in the field of battle against the British during the Boer War.—Stratford Beacon-Herald.

U.S. Population

Rate Of Increase Is Shown To Be Less By Census Bureau

The effect of immigration restrictions now being imposed by the United States is vividly seen in a calculation of the rate of population growth issued by the census bureau at Washington.

The bureau has an automatic register of the country's gain in population, the accuracy of which is tested once every ten years when the census is taken. In setting the register, bureau officials take into account the four factors: Births, deaths, immigrant arrivals and emigrant departures. Hereafter the net result has been computed as an increase of one every 23 seconds. Recently the register was slowed down. It now clocks a gain of one person every 36 seconds.

The chief reason for the change is that immigrant arrivals, formerly one minute and a half apart, are now twelve minutes and a half apart. The net rate of gain is equivalent to an annual increase of 0.7 per cent. in population, whereas the old rate was equivalent to 1.2 per cent.

Maintains Fliers Just

Circle North Pole

North and South Trip Around World Not Possible Says Volva

Wilbur Glenn Volva, overseer of the Christian Catholic Apostolic Church, Zion, Illinois, and proponent of the theory that the world is flat, has his own ideas about around-the-world flyers. Asked about them he said:

"Around-the-world flyers? They just go in a circle around the North Pole. The trip around the equator will be comparatively easy to make but the trip around the earth in a straight north-and-south direction will not be accomplished for the reason that it cannot.

W. N. U. 1599

Britain's New 'Planes For Coast Defence

Incomparable For Speed, Rate of Climb and Fighting Efficiency

The complete re-equipment of a Royal Air Force squadron stationed at an aerodrome near the south coast of England, with "Purys" single-seater fighting aeroplanes marks an important stage in the progress towards perfection of London's air defence.

Twelve of the fastest war "planes" yet placed in service anywhere in the world, with adequate numbers in reserve, provide a spearhead to the defence organization keener and more effective than before. No service aircraft built outside Great Britain compares with them in speed, rate of climb and fighting efficiency.

This twentieth-century weapon of defence is a graceful small biplane, clean and lovely of line. The streamlined nose carries within it a supercharged engine from which power is obtained sufficient to drive the aeroplane at a speed of 214 miles an hour, even with full load on board, and to take it to a height of 20,000 feet in nine minutes. One man, armed with machine-guns and provided with elaborate oxygen-breathing apparatus for the ascent into the rarefied air of the great heights, controls this winged projectile.

The Hawker "Purys" belongs to the type of war machine called the "interceptor fighter."

The name exactly indicates its function—to intercept the raiding planes of the enemy and to bring them down. It is a type of war machine called the "interceptor fighter."

Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

Made in Canada

Glamorous Days Of the Past

Interest Being Shown In the Early History of Canada

And here is something even the most earnest students of history do not know! Old French-Canada, and the glamorous days of Indian warriors, missionaries and heavy pelts, have sold and are still selling everywhere from automobiles to hairpins. This announcement was made recently by E. Z. Massicotte, court house archivist at Montreal. He said that writers of advertising matter from James Bay to the Gulf of Mexico have found that the colorful and sometimes legendary history of old Canada makes good "copy." The result is an increasing tide of requests to the archives for correct information.

Copy writers and artists are equally distributed among the correspondents. "What is the right date?" is one of the most frequent queries from men seeking atmosphere to their wares.

A hotel with a French name in the south-western days of Indian warriors, missionaries and heavy pelts, have sold and are still selling everywhere from automobiles to hairpins. This announcement was made recently by E. Z. Massicotte, court house archivist at Montreal. He said that writers of advertising matter from James Bay to the Gulf of Mexico have found that the colorful and sometimes legendary history of old Canada makes good "copy." The result is an increasing tide of requests to the archives for correct information.

The "history advertisement" began about five years ago, and now is widespread in Canada. The practice is gaining ground rapidly in the United States, especially for use in the middle west and the northwest region. And Mr. Massicotte's correspondence shows it.

"Five years ago," he says, "my letters were mainly from the seeker of the 'phantom fortune' or from classical seat, or learned individual working on history. But now they are outclassed by the eternal search of the advertising man for 'something different'."

Bricks Without Clay

Variety Of Other Materials Being Used For Special Kinds

While all the ordinary building bricks are still made of clay, a variety of other materials are now being used for special bricks. For instance, sea ooze is the substance from which the new sound-proof bricks are being baked. These bricks are very light in weight and have really wonderful sound-resisting properties. Then there are slate bricks made of the powdered rubbish from slate quarries, and glass factories. Both these are very strong and durable. The best British fire-bricks are made in Wales of almost pure silica—that is, flint, but the bricks which will withstand the greatest degree of heat are of a clay found near Arles in France. This clay is composed of alumina and oxide of iron with a little flint. A brick is usually a heavy thing, but there is one kind of brick made which will actually float in water. This is composed of a fossil earth found in the Italian province of Tuscany.

Shrinkage Of Wood

The fact that wood shrinks in volume as it loses moisture, and swells as it picks up moisture, is responsible for much of the difficulties experienced in the manufacture and use of wood. Much can be done through careful seasoning and conditioning treatments to control this so-called "working" of wood. Among the activities of the Forest Products Laboratories of the Department of the Interior at Ottawa is the conduct of research in this connection and the distribution of information in this regard to lumber producers and users.

A Sea-Going Library

Houston, Tex., boasts a sea-going library. Two shelves in a shabby cottage on the waterfront hold 200 books which summer can borrow and read at their leisure on their cruises to far or near ports. The cottage is the reading room of the Marine Transport Workers.

Frequent Drowning Accidents

Perils That Lurk In Lakes and Rivers Should Be Stressed

While hopeful progress is being made in the prevention of certain classes of accidents, it is very evident that a campaign of education in regard to the perils that lurk in lakes and rivers is required. Too many young lives are being needlessly sacrificed.

No less than eight drownings occurred in Manitoba in the last week-end in June. Twenty-two people met death in boating and bathing accidents in Ontario during the last week-end. One hundred and thirty-nine lives were lost in the same way on the Fourth of July in the United States.

The deplorable toll is mainly of young people, who seek the legitimate and wholesome pleasures of boating and bathing but who forget that the waters are merciless to those who are careless or take undue chances.

The fatalities that are continually happening indicate the danger is not sufficiently realized by the young people, and points the necessity for a systematic campaign of prevention.—Manitoba Free Press.

THE RHYMING OPTIMIST

By Aline Michaelis

YESTERDAY

What is yesterday, my Dear?
Just a shadow leaving;
Worth no tribute of a tear,
Worth no moments grieving.

Brave hearts thrust aside the past,
Gauds or gold it brought them;
Flinging all away at last,
Save the truth it taught them.

What is yesterday, my Sweet?
Just an echo going
Down a bare, untrodden street
Where no life is flowing.

Leave it as a brave heart must
With no thought of sorrow;
Putting all your faith and trust
In a glad tomorrow.

Miller's Worm Powders seldom fail.
They immediately attack the worms
and expel them from the system.
They are complete in themselves, not
only as a worm destroyer, but as a
healthy, healthy, healthy medicine for
children, correcting weak digestion
and restoring the debilitated system to
healthfulness, without which the
growth of the child will be retarded
and its constitution weakened.

Depression May Be Helpful

Teaches People How To Face Adverse Conditions With Fortitude

In time of depression prepare for prosperity. By doing that you can keep your mind off your troubles and make the most of your situation. It is a foundation of policy that will be a help in keeping prosperity from flying away a second time, once it has returned. Adversity is seldom sweet, but it may be made extremely useful. The practice of fortitude and the ability to put by experience are marks of character and good sense; and character and good sense are the foundations of about all that is worth while in life.

An Expensive View

Proprietor of Mountain Hotel (to newly arrived guest): "This is your room. If you want a fine view over the mountains put a franc in the slot and the shutters open for five minutes."

"What is the matter with that baby that he always cries?"

"He is getting his teeth."

"Doesn't he want to have them?"

Some of the swords and daggers used by Mayan Indians in Yucatan were of chool wood, which is extremely hard.

Aching CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

Putnam's

The ADVENTURES OF CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE? After many adventures in China, Captain Jimmy is forced to land behind the enemy lines, to place a raid on the military camp to secure gasoline and oil.

While Lieutenant Stone threw the military camp into an uproar, I whistled softly to Scottie. I went through the darkness toward the big, imposing tent.

Quietly I slipped under the canvas, and felt my way quietly around the sides. As my eyes grew more used to the darkness, I could see the outline of a large cot on which someone lay sleeping soundly. Scarcely daring to breathe I crept softly forward. Then before the surprised Chinese could offer any resistance, I grabbed him and secured his arms behind his back.

Under his pillow I discovered no less than two pistols and a knife. The knife I threw away. One pistol I pocketed, and the other I tucked into my belt. Wrapped in a blanket, I shoved my captive under the tent wall and marched him alone to where the horses were held by Fu San.

Once we had put some distance between ourselves and the camp, I turned to my prisoner. "To our amazement, we saw that he was a Chinese, and not a personage that General Fang as a hostage."

"Tell him," I said, "that as soon as he becomes light, he will write me an order for 120 cases of gasoline."

The interpreter translated my message. General Fang he no can do. The interpreter said he no can do. The interpreter said he no can do. The interpreter said he no can do.

poor Chinese looked so funny in his right clothes and blanket, yet he just could not forget his rank of General. Pulling out my pistol I made a number of horrible faces, expressing the dozens of deplorable things that would certainly happen to him if he continued to refuse our demands.

Being a sensible man, and a General he decided to yield handsomely since yield he must.

"He may," he can do," translated Fu San to "very glad to do such little favor for fine gentlemen."

At daybreak I rode out to the camp with the General's written order in my pocket, and his gold signet ring on my finger, as proof of my authority.

The camp was still and immediately we were sighted a group of mounted men galloped out and surrounded us. In a loud and commanding tone I intimated that we had taken at once to the commanding officer. To him I showed the ring and made the demands for gas, oil and food.

We got plenty of immediate action. Sturos were loaded with gas, oil and food and we set out for camp. Leading off in a round about way, it was over four hours before we shook off the last flying soldier and finally reached the plane.

For us, the thinned food was a real feast and even the Chinese seemed to enjoy it. Break-

put him to work supplying the camp with gas, oil and food. To him I showed the ring and made the demands for gas, oil and food.

BINDERS FOR SALE

Whether you need a Binder or not we invite you to come in and see the new Massey-Harris. See the New Forecarriage, two horses each side the pole. It will probably pay you better to make a payment on a New Binder and save the worry and delay rather than put that same money into the old one and still have the old one when you are through. The low price of grain is all the more reason why you should save it all. Remember, the Massey Harris is now the lightest running binder on the market. Come in and let us show you. If you want a second hand one, come in and see us. How about getting those Waggon Wheels fixed up now before the harvest rush. If your wheels are dished, we can straighten them and guarantee satisfaction. Remember, we do Woodwork as well as Blacksmithing.

Vic Hutchinson

BLACKSMITH AND WOODWORKER

P. S.—Don't leave your repair order until the last minute.

WOMEN'S INSTITUTE

The Garden Party held at the home of Mrs. Sanders was a huge success. A large crowd gathered in the evening for the platform dance which did not break up until the wee small hours of the morning.

The Mr. Sharp entertained all afternoon and the early part of the evening on the bagpipes. All the Scotch people were made very happy. The members of the Institute wish to thank everyone who helped or contributed cooking, or in any way helped to make the garden party the complete success it was. Our thanks go out to Mr. and Mrs. Sanders and family for the use of their home and the music so willingly donated.

At the Grandmothers' Day we enjoyed the company of twelve grandmothers, 22 other visitors and 26 members.

Piano solos, vocal, guitar, also reading were very much enjoyed. The response to the roll call on, "Where we met our husbands", was very amusing and in several cases called forth some hearty laughter.

Every one present expressed their pleasure of the afternoon's event, and will look forward to the yearly event in the coming year. Pictures were taken of the grandmothers, also of the entire group. Those wishing a souvenir of the occasion, if they will hand in their names to the Secretary with the required amount, we will be glad to oblige.

The next place of meeting will be the home of Mrs. Flowelling on August 6th. Roll call will be answered by "The first recollections of our childhood days."

CRESCENT HILL

Mr. and Mrs. Sutherland of Edmonton visited their daughter, Mrs. Fitzpatrick, Mrs. Stewart of Detroit, another daughter and Miss Henderson, a granddaughter, accompanied them.

Those who attended the dance at Crescent Hill School on July 17th, reported having a very good time. There were several impromptu attractions. One young gentleman gave a genuine fire-eating exhibition. Another gentleman of seventy-six years of age showed us how to step dance. The music was supplied by several members of the community, but the main stay was Mr. Sanders and his family. The dance was put on by Miss Edith Fitzpatrick and Miss Leona Frye for the purpose of raising funds to get equipment to start a Girls' Soft Ball team. There was a fairly large crowd present so you can expect to hear more of this team before very long.

VIKING

E. Solstad and family left last night for a month's holiday trip to California. They will return via St. Paul and Winnipeg, visiting several places enroute.

J. J. Skaltzky is the owner of one of the latest model Fords, purchased through the local dealers, McAthey & Sons.

Mrs. Geo. Brown and family and Miss Bella Anderson have left for a six weeks vacation at Gull Lake.

Mrs. P. E. Finch and daughter, Miss Aileen were among those who attended the Edmonton exhibition last week.

Main Street

Mr. Thoreson was relief pumpman during Mr. Enger's absence.

Mrs. Seaton of Edmonton has been a guest at the home of Miss C. A. Sellers for a short while.

A good crowd attended the Legion picnic at Steffenson's Lake and everyone appeared to have a good time.

A daughter arrived at the home of Mr. and Mrs. L. B. King, Friday, July 17th.

Mrs. I. Knudson, Postmaster at Irma, is attending the Postmasters convention at Edmonton this week.

Mr. Clarence Costin is renewing acquaintances in the Irma district.

Mr. N. B. McMillan, of Brem'er is visiting his brother Mack, in the Alma Mater district.

Miss Jean McLean is having a holiday at Jasper, Alberta.

Mr. and Mrs. Ross McFarland motored to the city Wednesday afternoon.

Miss Clara King, of Edmonton, is spending a week with her brother, Mr. King, at Irma.

The Valley U.F.W.A. wish to state that the visit of Mr. Cook to Valley School is to be on August 7th and not in July as previously stated.

Mr. and Mrs. D. P. A. McBeth, of Tessler, Saskatchewan, are visiting with friends in the Sunny Brae district, they are staying with Mrs. Smart.

Mr. and Mrs. Ralph Dunlop and little son Orville are visiting at Mrs. Dunlop's former home, Mr. and Mrs. Jas. Jenson, in the Sunny Brae district.

Among the crowd at the entertainment Monday night was Mr. and Mrs. Newton Horning and wee baby. Mrs. Horning was formerly Mrs. Laidir, and her many friends were pleased to see her in Irma again.

Mrs. Dick Rohrer returned home on Saturday from the Misericordia Hospital, Edmonton, where she recently underwent a very serious operation for inward goitre. Dr. C. C. Tatham performed the operation.

The Irma Ladies Aid are planning a social for August 6th, to be held at the Fenton home. This will be something different so keep this date open and watch for posters.

Mr. and Mrs. Armitage and baby of the Buffalo Coulee district, left Thursday for England where they intend making their future home.

Mrs. Seton and Miss Norma McConiche, returned to Edmonton on Thursday after spending two weeks with friends in the Irma district.

Mr. and Mrs. O. Enger Sr., spent their holidays with their daughter Mrs. H. O. Davis at Medicine Hat. The Misses Mabel and Clara Enger accompanied them but were having such a pleasant time they have not yet returned.

The regular meeting of the W. M. S. was held at the home of Miss Mathews in the Albert district. Two car loads of six ladies each went out from Irma, so with as much more from Albert the house was filled. Mrs. Osterhout, associate helpers secretary conducted the meeting. After the usual business was over Mrs. Reeves of near Manville was called on for an address and gave a real treat in telling of her experiences during her six years as a missionary nurse in Palestine. Our only regret being that the afternoon went so quickly and that more of the members had not been able to attend. The Albert ladies served lunch at the close of the meeting. The next meeting of the W.M.S. will be in the form of a picnic at King's Park, at Fabyan bridge, on August 12th, when all the members and friends are invited to come and bring their husbands and families and a basket of eats and dishes for themselves.

IRMA SCHOOL REPORT

Following is the report of promotions in Senior Room, Irma Public School.

Grade VIII—Marvin Levitt 92.2; Ray Locke 76; Jack Peterson 69.0; Ralph Schoner 69.8; Ted Thurston 69.10; Dolton Herbert 67.2; Leslie Robertson 64.8.

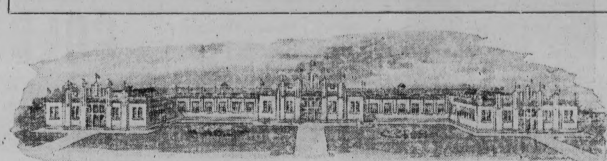

Grade VII—Aletha Knudson 91; Wm. Milburn 84; Ralph Congdon 83; Ellen Congdon 81; Albert Glasgow 72; Albert Barber 62; Roy Lattner 60.

Grade V—Robert Charter 83; Mildred Hill 87; Clarence Carter 87; Ethel Tate 80; Arthur Lundson 79; Roy Sharkey 71; Gunnar Larson 71; Lewis Jones 60; James Sharkey 59; Florence McDowell, Principal.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

NOTED EXHIBITION SPECIALIST TAKES CHARGE OF WORLD'S GRAIN SHOW BUILDING

World's Grain Exhibition and Conference Building

J. O. Turcotte, Canadian Exhibition Commissioner, has arrived in Regina for the purpose of conferring with members of the executive and exhibition committee of the World's Grain Exhibition and Conference to be held at Regina in 1932. Mr. Turcotte will have charge of the interior decoration of the building specially erected to house the 1932 exhibition and conference.

Recently, Mr. Turcotte returned to Canada from the British Trade Exposition at Buenos Aires, Argentina, where he had complete charge of the Canadian Pavilion. He is expected to remain in Regina for a few days in conference with various officials of the World's Grain Exhibition and Conference.

Mr. Turcotte, who is a French-Canadian by birth and a Paris-trained architect, was appointed Canadian Exhibition Commissioner in 1925. For some years prior he had been assistant exhibition commissioner. He was responsible, almost in its entirety, for the Canadian pavilion at the British Trade Exhibition, Wembley, England, 1924-25, and for the Canadian Pavilion at New Zealand in 1924. He was also in charge of the decorative features of the building which housed the World's Poultry Congress at Ottawa in 1927, the Canadian pavilion at the Antwerp Exhibition in 1930, the Canadian exhibit at the World's Poultry Congress at the Crystal Palace, London, England, last year, the Canadian exhibit at the Paris Exposition the same year and the Canadian Pavilion at the British Trade Exposition at Buenos Aires last March.

On two occasions Mr. Turcotte has been directly honored. At the opening of the Wembley Exhibition, attended by over 130,000 people, he was given the honor of being named by His Majesty the King and at Antwerp he was also awarded the title of Knight of the Belgian Legion of Honor. On both occasions for the excellence of his work.

J. O. TURCOTTE

The plans and specifications of the buildings in which Canadian exhibitions are housed. He superintends the construction, designs, educational and commercial exhibit stands and is also responsible for the entire color schemes and decorative features.

Mr. Turcotte is the originator of the style of decoration work in seed, samples of which have already been displayed at Regina in the form of the crest of the World's Grain Exhibition and Conference. When his services for the decorative work of the World's Grain Exhibition and Conference hall at Regina were made available to the organization by the Canadian Department of Trade and Commerce he saw the opportunity to develop the seed style of interior decoration as being particularly appropriate for the first exclusive "seed" exhibition and conference in history.

This style of interior decoration came as a result of Mr. Turcotte's study of modern work. If other schemes could be worked out in small pieces of marble, he achieved the scheme which he conceived from natural Canadian products and for the interior decorative features of the building.

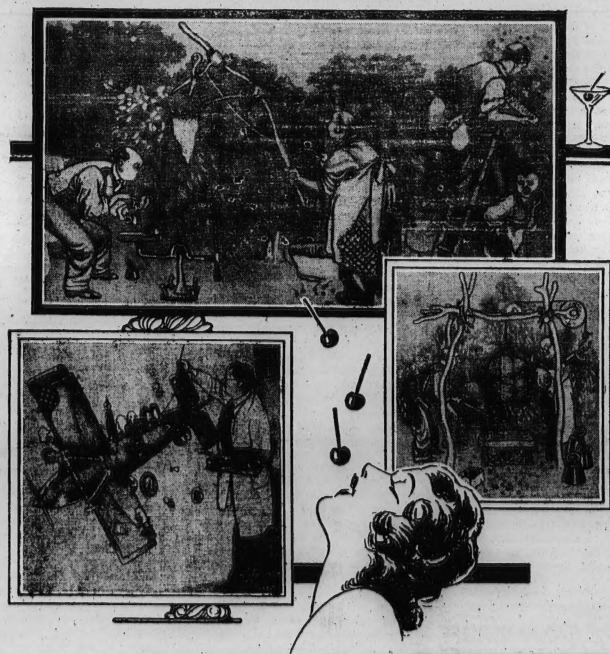

work of the World's Grain Exhibition and Conference he has chosen seeds of various kinds which will permit him to work out the most elaborate decorative features.

Those who have been associated with Mr. Turcotte at former world exhibitions state that he has built up a reputation of never being late. All Canadian pavilions of which he has had charge at exhibitions in different parts of the world have been ready for the public by opening day. He created a noteworthy record at Wembley in 1924 when the Canadian Pavilion was the only one of the hundreds of structures actually complete in all detail at the hour set for opening.

Mr. Turcotte also established another record in connection with the Buenos Aires Exposition. The Canadian Pavilion was actually built in London, England, and consisted of a wood building about 80 feet high, 100 yards long and 30 yards wide, made in 25,000 pieces. The pieces were numbered, packed into thousands of cases, the whole weighing about 1,200 tons. They were shipped to Buenos Aires and upon his arrival Mr. Turcotte started the work, set the building up, planned and erected the decorative features and had the pavilion ready for the public nearly two weeks before the official opening. English newspapers, in connection with this remarkable feat, described the building, at the time of meeting, as the world's greatest flower parade.

The above victory layed out shows the magnificent new building erected on the exhibit grounds at Regina to house the World's Grain Exhibition and Conference in 1932. The cost of the building and decorations is approximately \$250,000. It has an area of 175,000 square feet with an exhibit space of 100,000 square feet. The building is made of steel and concrete, with a roof of one and one-half inches. The building is made of steel and concrete, with a roof of one and one-half inches. The building is made of steel and concrete, with a roof of one and one-half inches. The building is made of steel and concrete, with a roof of one and one-half inches.

Imagination Runs Riot

When he launched the 42,500 ton Canadian Pacific liner Empress of Britain, H.R.H., the Prince of Wales, referring to the Kalkreuth-Bar—as the cocktail bar of that magnificent new ship is to be known—said that its frequenters, "can let their imagination run riot in a rosy haze amid the fantastic humour of Mr. Heath Robinson."

The Prince referred to the announcement that Britain's foremost humorous artist has been given a free hand to decorate that room on the new liner which is to make its bow to Canada June 22nd next.

Developing a humorous legend of the cocktail of his own invention, W. Heath Robinson, who is shown above at work on some of the panels, has prepared a decorative scheme that extols the virtues of the cocktail and depicts ingenious machinery employed in its manufacture.

Heath Robinson's ideas of the latest labour-saving machinery in connection with the selection and preparation of cherries for cocktail embellishment are shown together with the Foolproof Safety Aeroplane, a direct descendant of his mythical cocktail bird. This ceiling decoration depicts the uplifting powers of an appetizer. These, and other drawings will appear on the walls and ceiling of the room.
